

LCOE at 7% real discount rate: baseline band (high → low capacity factor) vs observed

All values in USD2024; every row converted at the ECB annual rate of its stated price year and inflated with US CPI-U. Bracketed numbers refer to build/sources.md. Bars span the capacity-factor band in config.yaml; fuel at technology-data 2025 prices, CO2 price 0 EUR/t. Observed LCOE benchmarks assume their own financing and fuel assumptions.
