

Direct air capture: 2025 capex+FOM baseline vs observed prices and targets

All values in USD2024; every row converted at the ECB annual rate of its stated price year and inflated with US CPI-U. Bracketed numbers refer to build/sources.md.
Bar: technology-data DAC capex + FOM annuitised at 7% over 20 a at 90% availability, excluding heat/electricity and storage; the SOW uses 300-600 EUR/t (150 in the CDR breakthrough) as the cost cut-off.

■ technology-data v0.15.0 (2025) ▲ Project estimate / target ◆ PPA / auction price —+— Benchmark range (Lazard, ATB, ...)
